Naufal

.NET DEVELOPER

INTERMEDIATE

SUMMARY

S1 Informatics Engineering graduate from Indraprasta PGRI University Jakarta with 2+ years of hands-on experience as a Fullstack Developer specializing in .NET Core. Passionate about technology and problem-solving, with strong ability to deliver robust, scalable, and maintainable web applications.

EDUCATION

Informatics Engineering - S1
Universitas Indraprasta PGRI Jakarta

SKILLS

Technical Experience:

Programming Language:
C# | Javascript | Java | Python

Frameworks:
.Net Core | Entity Framework

Database:
Microsoft SQL Server | MySQL

Subversion:
Git | Github

Container:
Docker

Internal Web-Based System (Comparison & Management Tools)

(An internal web-based system designed to assist business consultants in comparing units, covering product specifications, features, and technical documents.)

.NET CORE MVC, MICROSOFT SQL SERVER, JQUERY, ENTITY FRAMEWORK, SIGNALR, IIS, CLEAN ARCHITECTURE | SEP 2024 - JUL 2025

Responsibilities:

1. Enhanced internal system features to improve usability and efficiency.
2. Refactored ~70% of legacy code, resulting in optimized performance and maintainability.
3. Implemented new business logic to streamline workflows and align with updated requirements.

Customer Management Module (Enterprise System)

(Developed a new customer management module within an existing enterprise system, focusing on backend development, large-scale data processing (10,000+ records), and seamless integration with a React frontend.)

NET 6 WEB API, SQL SERVER, STORED PROCEDURE, DAPPER, REPOSITORY PATTERN, N-LAYERED ARCHITECTURE | MAR 2024 - MAY 2024

Responsibilities:

1. Collaborated with UI/UX designers and analysts to align system design, user interface, and data structure.

2. Optimized high-volume data processing through efficient Stored Procedures and Dapper ORM.
3. Built and integrated RESTful API endpoints to support frontend consumption in a React-based interface.

Internal Psychological Assessment Web Application

(An internal web-based application developed to support recruitment processes, providing multiple types of psychological assessments (DISC, RIMB, PAPI Kostick, MSDT, IST) with automated psychogram report generation. Built from scratch in a small team and deployed in an internal server environment.)

.NET 6 (MVC & WEB API), SQL SERVER 2019, ENTITY FRAMEWORK CORE, JWT, RAZOR PAGES, BOOTSTRAP, JQUERY, ADMINLTE, KATALON, IIS | MAY 2023 - APR 2024

Responsibilities:

1. Developed backend APIs using .NET 6 Web API and Repository Pattern to ensure maintainable and scalable architecture.
2. Designed and implemented a responsive frontend UI with .NET Core MVC, Bootstrap, Razor Pages, and interactive components using jQuery and Ajax.
3. Managed database design and development using SQL Server 2019 and ensured smooth deployment on IIS server.
